

Drier, safer, stronger

[Drive hygiene on-farm]

[Drive hygiene on-farm]

PURLite is a blend of vegetal and mineral raw materials with absorbent, cleaning and non-irritating properties.

Perfectly suitable for the environmental management of poultry and their bedding thanks to its powerful drying and odor-binding effects.

GOOD ENVIRONMENT

PURLite absorbs moisture and binds the ammonia from the litter. Environmental conditions improve considerably.

ANIMAL WELFARE

PURLite improves animal welfare by providing clean and comfortable environment.

OPTIMAL PERFORMANCES

By improving the litter conditions, challenges such as foot pad lesions, breast blisters, pathogens and risks of respiratory diseases are limited.

PROFIT

Through a global improvement of rearing conditions, PURLite allows a reduction of animals rejections at slaughter, while decreasing bedding and veterinary costs.

Key benefits

Reduces humidity and prevents foot pad lesions and breast blisters

Improves quality of the litter by powerful drying and odor-binding effects

Does not irritate the skin of the animals and the operators

Improves animal welfare and performances
